

Open positions for PhD students

Nanochemistry Lab. at Okayama University

www.nanochem-okayama-u.net

Exploring nanometrology with the novel functionality of inorganic nanomaterials.

Group introduction

The aim of our research is to explore nanometrology by exploiting the novel functionality of inorganic nanomaterials. We are currently investigating nanoscale properties of biological samples and electronic devices, through optical responses of nanodiamonds and metallic nanoparticles. Our group was launched in Okayama University in April 2021.

Research topics

There are currently three ongoing projects as below. We ask you to propose your own PhD projects in the following our ongoing topics as below. We are happy to explain the details of our researches to support your project development.

1. Quantum measurement systems for probing temperatures in cells and multi-cellular organisms.
2. Functional nanomaterials using nanodiamonds and metallic nanostructures for quantum sensor applications.
3. Exploring new applications of quantum temperature sensors in electronic device science.

The Candidates

We are looking for highly motivated candidates who have background in photonics, physics, chemistry, biology, electrical engineering, or with experience in either of microscopy, optical spectroscopy, electron spin resonance, nanodevice fabrication. The candidate should be comfortable with English communication. We offer excellent working conditions and a state-of-the-art infrastructure in a highly dynamic environment at the forefront of research.

Financial support

The living cost in Okayama as PhD students is mostly 100-150 k¥ (Room rent: 30 k¥, Utility: 5 k¥, Food: 40 k¥ per month, etc...). Our university has multiple supporting systems (fellowships up to 200 k¥ per month and other scholarships). We ask the candidates apply to these supports first. If the support is insufficient, we are happy to support you from our research budget.

Contact & application procedure

Contact to Prof. Fujiwara with a motivation letter, detailed CV. After having on-line discussion with us, you will need to build project details of your PhD study. Then, the candidates are required to take entrance examination (mainly interview) of the university (see details [here](#)). Feel free to ccontact us for the detail!

Masazumi Fujiwara, PhD

Associate Professor, Department of Chemistry, Okayama University. masazumi@okayama-u.ac.jp

Nanodiamond quantum sensors for biology and electronic devices

State-of-the-art microscopy

Okayama University is a historical national university with diverse research programs. It is one of 22 “Research Universities” designated by Japanese government. Many international students are studying in our campus (indeed 1/3 of graduate-school students in our department come aboard). With various supports from the university and a relaxed atmosphere of Okayama, most of international students enjoy studying at Okayama University.

Okayama, known as the “Land of Sunshine”, is an amazing city with fine weather and wonderful scenery. Located 200 km from Osaka and easy day trip to Kobe, Osaka, Kyoto.
